Installation Manual

1. General Information

The current Installation Manual contains instructions for the installation of the Quality Assurance Tool system.

2. Installation guides

Download the zip folder of the application from the EASO web site to your local system.

Unzip the zip folder: right click with the mouse on the zipped folder
Click on Extract All
Select the desired location for saving the tool

Double-click on the unzipped folder

Right click with mouse on index.html file. Choose the option “open with” and then select any supported browser.
Once the tool is opened the user lands on the QAT home page.
Appendix A – Description of the folders

It is strongly advised not to modify these files, as they are files needed for the proper functioning of the tool. Please note that in case of update these files can be deleted or replaced.

Main folder
It contains the following files:

- Index.html: the main file of the application
- Favicon.ico: icon of the application
- Options.js: define the language of the tool, the cover text of the exported pdf and the logo for the cover of the exported pdf
- qatUserManual: the manual of the application in pdf format; it can be seen also inside the application; check the user manual
- version.js: the current version of the application

And the following folders:

assets
It contains java script, css files and libraries, which are saved in the following folders:

- css: It contains the libraries css files
- font-awesome: It contains the libraries, whose icons are used to the placeholders of the fields of the tool
- js: It contains the libraries js files
- lato: It contains the libraries of the displayed font

css
It contains css files, which have been created and reflected on the user interface of the tool

data
It contains the following folders:

- FirstInstanceDecision
- PersonalInterview
- ReportPage

Every of the above-mentioned folders contains one sample per page.

js
It contains js files, which define the functionality of the tool.

lang
It contains the language file. The files are in plain text and can be easily added or modified.
The user is able to add a new language.

**How to**: Copy an existed language.js file and paste in the same folder, rename it using the desired language, for example Italian.js, open the file with Notepad++ make the translations and save the file.

### Appendix B – Supported Browser

The browsers currently supported are:

- Chrome starting from version 70.0.3538.102
- Firefox Mozilla starting from version 63.0.3
- Opera starting from version 56.0.3051.104

### Appendix C – troubleshooting

1. After opening the tool, the user faces a frozen screen: Press ctrl+F5 in order the tool is restarted
2. In case that ctrl+F5 does not fix the user’s problems uninstall and install again the tool in the user’s laptop/pc

### Appendix D – Contacts

In case of issues in installing the application it is possible to contact EASO Help desk sending an email to EASO ICT Service Desk ICT.Helpdesk@easo.europa.eu.

In the email please indicate:

- Operating system on your pc/laptop
- Browser and version of the browser on your pc/laptop
- Version of the QAT tool. The version of the QAT tool can be found in the home page.
